

PROGRAM OUTCOMES (PO)

The Program Outcomes of M.Tech. in Computer Science and Engineering (Networks) enable students to:

- PO1: Independently carry out research/investigation and development work to solve practical problems
- PO2: Write and present a substantial technical report/document
- PO3: Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.
- PO4: Design network hardware architecture and software for wired and wireless communication networks
- PO5: Model and Simulate Network topologies using Network Elements to demonstrate and analyze the performance
- PO6: Apply concepts and processes to develop intelligent and secure networks
