

Programme Educational Objectives (PEOs)

Industrial & Production Engineering graduates will be able to:

PEO 1: Apply the knowledge of technical fundamentals related to industrial and production engineering to address the needs of society.

PEO 2: Develop innovative technologies and find solutions to complex engineering problems, using modern engineering tools.

PEO 3: Communicate efficiently as a member of the multidisciplinary team to convey effective decisions.

PEO 4: Enhance the intellectual breadth with updated knowledge and adapt to changes in environmental, safety, economic and ethical needs.
